

LIVEPICTURE

Our patented LivePicture is a unique combination of innovation, design, and greenery. LivePicture is a picture made of high-quality materials, including a powder-coated steel frame and a system of interchangeable plant cassettes. The watering system included in the frame supplies enough water to keep the plants thriving for four to six weeks. This innovative system does not require electricity or a pump to deliver the right amount of water and nutrients to the plants. Different types of plants allow you to experiment with foliage and color patterns to create different artistic effects. A custom-designed LivePicture enhances any living, learning, or working environment and adds all the positive features of living greenery.
