

# LiveDivider PLUS®

## **Product description**

The LiveDivider PLUS is a modular green room divider. This unique system allows you to stack to suit one, two or three modules with interchangeable cassettes that serve as planters, including a tank. The plants get their water from an internal water buffering system that makes use of capillary action. This ensures that the plants are constantly supplied with water for four to six weeks. The system works without electricity, pump or water drainage.

## **Available colours**

The LiveDivider PLUS is available in white and black as a standard and can be supplied in any RAL colour on request.

## **Dimensions**

The dimensions of the LiveDivider PLUS are (w x h x d):

- LiveDivider PLUS 1: 112 x 81 x 19 cm
- LiveDivider PLUS 2: 112 x 131 x 19 cm
- LiveDivider PLUS 3: 112 x 180.5 x 19 cm
