

LIVEDIVIDER PLUS

LiveDivider PLUS®

The modular green room divider

The LiveDivider PLUS is a modular green room divider that makes it easy to provide a pleasant atmosphere and privacy in offices, public buildings and waiting rooms. This unique system allows you to stack to suit one, two or three modules with interchangeable cassettes that serve as planters, including a tank. This makes the LiveDivider PLUS a highly flexible, space-saving room divider with extensive possibilities in application. The plants on either side of the room divider absorb ambient noise and improve the indoor climate. LiveDivider PLUS creates privacy and distance while retaining a room's open aspect.

ADVANTAGES

- A simple and sustainable way to divide spaces
- Improves acoustics and dampens sound
- Improves the indoor climate and air quality
- Improves concentration, productivity and general well-being, reducing stress
- Takes up little space

indoors offices schools restaurants
