

PLANTGUIDE

PLANTGUIDE

The Mobilane PlantGuide provides a plant-by-plant overview of selected species used in the different Mobilane products. Although there are thousands of plant types in the world, not all are suitable in all situations or applications. Each plant has its own characteristics, ideal conditions and preferred planting location. Factors that should be taken into account when choosing a plant for green walls and façades include temperature, climate zone, sun exposure, shade, soil type, moisture requirement and surface orientation. Contact Mobilane Technical Support for advice or further information.

PLANTING PATTERN

A green facade or living wall can be cultivated according to a pattern. The pattern can be designed according to your wishes, thus giving the façade a unique appearance.

Mobilane has developed some standard in and outdoor mixes with plants that combine well with each other. These mixes are grown in the nursery so that they are fully grown when delivered.

PLANTGUIDE

INDOOR PLANTING

AGLAOMORPHA CORONANS

A fern related to the well-known oak fern. Air-purifying with beautiful bright green, slightly shiny leaves.

AGLAONEMA 'CRETE'

The Aglaonema 'Crete' is an easy plant to grow, enjoying a reasonably light spot avoiding direct sunlight. Distinctive pink/red stems and leaves.

AGLAONEMA 'KING OF SIAM'

The Aglaonema 'King of Siam' is a colourful foliage plant with striking pink and green tones. It thrives in low light and requires minimal care

AGLAONEMA 'MARIA'

The Aglaonema 'Maria' is an easy plant, growing best in a reasonably light spot but not in direct sunlight. Green leaf with a light pattern.

ASPARAGUS FALCATUS

The Asparagus falcatus is a thorny plant, a cross between an asparagus plant and a curly fern. Easy to care for, it grows best in a reasonably light spot away from full sun.

ASPARAGUS SETACEUS

A graceful plant with fine lace-like, needle-shaped leaves. Resembles a fern but is actually an ornamental asparagus.

ASPLENIUM 'ANTIQUUM'

The Asplenium 'Antiquum' is a hardy, air-purifying fern with glossy, wavy fronds that adds a tropical touch to any space.

ASPLENIUM 'LESLIE'

Also called a nest fern in Dutch. Beautiful fresh leathery, shiny green color with wild curly leaves.

ASPLENIUM NIDUS

Also called the nest fern, from the stripe fern family. Bundled, 50 to 150 cm long light green undivided leaves, with a black midrib and corrugated leaf margins. Ideal for sunny or shady areas.

ASPLENIUM PARVATI

The Asplenium Parvati is a compact, elegant fern with delicate, dark green foliage, ideal for a stylish, natural look.

CHLOROPHYTUM COMOSUM 'BONNIE'

Also known as Grass Lily. Known for air purifying qualities. A strong plant with tubers in the soil that contain reserve food.

CHLOROPHYTUM COMOSUM 'OCEAN'

The Chlorophytum comosum 'Ocean' is a simple air-purifying plant. Also known as Zebra Grass due to its white leaf stripes and white outer edge.

PLANTGUIDE

INDOOR PLANTING

CODIAEUM (CROTON) VARIEGATUS 'PETRA'

An indoor plant with beautiful variegated leaves.

CTENANTHE BURLE-MARXII

The Ctenanthe Burle-Marxii (Calathea amabilis), also called Nel, is a good air-purifying plant, distinguished by its leaf pattern and dark red underside. At night the plant's leaves pull together and a rustling can be heard.

MONSTERA DELICIOSA

Also known as the Swiss Cheese Plant, this air-purifying creeping climbing plant also does well in darker places. The Monstera is known for its large, shiny, holey leathery leaves.

DRACAENA FRAGRANS COMPACTA

The Dracaena fragrans 'Compacta' is a robust, compact foliage plant with glossy dark green leaves, perfect for offices or modern interiors.

DRACAENA FRAGRANS COMPACTA VARIEGATA

The Dracaena fragrans 'Compacta Variegata' is a compact, slow-growing plant with striking variegated foliage that requires little light and minimal maintenance.

DRACAENA FRAGRANS TORNADO

The Dracaena fragrans 'Tornado' is a playful variety with twisted leaves, adding a sense of movement and structure to any green setting.

DRACAENA FRAGRANS 'JANET CRAIG'

A large plant with deep green leaves. Ideally suited for a shady spot in the room or office, preferably not to be placed in direct sunlight.

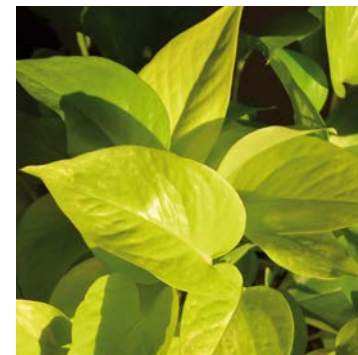

DRACAENA FRAGRANS 'LEMON SURPRISE'

Beautiful broad green leaves with lime-coloured edges.

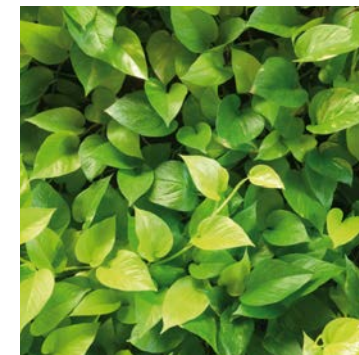

DRACAENA FRAGRANS 'MALAIKA'

The Dracaena, also known as the Dragon Plant, is an easy to care for plant that also helps purify the air. It thrives in full sun as well as shade.

EPIPREMNUM 'LEMON LIME'

Lauded as one of the best most air-purifying plants. Beautiful light green golden yellow leaves and easy to maintain.

EPIPREMNUM 'AUREUM'

Lauded as one of the best most air-purifying plants. Beautiful green leaves and easy to maintain.

EPIPREMNUM 'MARBLE QUEEN'

The Epipremnum 'Marble Queen' is an air-purifying plant with variegated leaves. The plant grows best in a light spot, away from full sun.

PLANTGUIDE

INDOOR PLANTING

EPIPREMNUM 'N'JOY'

The Epipremnum 'N'Joy' is an air-purifying plant that grows best in a light spot rather than full sun. The plant is characterised by its white spotted leaves.

FITTONIA VERSCHAFFELTII 'BIANCO VERDE'

Characteristic silver veins on the leaves. Requires minimal water and is very easy to maintain.

FITTONIA 'SKELETON'

Small plant with an attractive leaf pattern of pink on lime green.

MICROSORUM DIVERSIFOLIUM

The Microsorium diversifolium is also called the Kangaroo Fern. The plant grows best in a sheltered place. The dark green leaves are deeply incised and have black petioles.

MUEHLENBECKIA COMPLEXA

A graceful plant with small leathery and slightly heart-shaped leaves.

NEOREGELIA FIREBALL VARIEGATA

The Neoregelia 'Fireball Variegata' is a compact bromeliad with brightly coloured, variegated foliage. Decorative and easy to care for.

NEPHROLEPIS CORDIFOLIA 'DUFFY'

Also known as the Curly Fern. A strong plant with an abundance of fringes and frizzy leaves.

NEPHROLEPIS EXALTATA 'GREEN LADY'

A beautiful bright green curly fern that keeps its colour all year round.

PEPEROMIA CAPERATA 'SCHUMI RED'

Compact and attractive plant that is easy to care for. Beautiful deep red colour with unique deep-backed leaves.

PEPEROMIA ROTUNDIFOLIA

Compact and attractive plant that is easy to care for. Beautiful deep red colour with characteristic small round leaves on long stems. The plant needs a lot of light but not direct sun.

PHILODENDRON 'GREEN PRINCESS'

The Philodendron 'Green Princess' is a compact, lush plant with glossy green foliage – both strong and stylish.

PHILODENDRON MINIMA

The Philodendron minima is an easy-care plant and with air-purifying qualities. The plant grows well in a shady spot.

PLANTGUIDE

INDOOR PLANTING

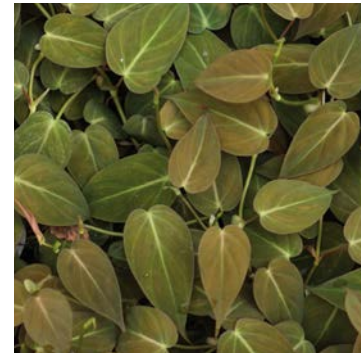

PHILODENDRON SCANDENS

A popular plant with heart-shaped, glossy leaves emerging bronze-coloured and then quickly turn green.

PHILODENDRON SCANDENS 'BRAZIL'

Philodendron scandens 'Brazil' is a popular plant. Heart-shaped, glossy leaves with a yellow variegated colour. Grows best in a semi-shaded spot.

PHILODENDRON SCANDENS 'MICANS'

The Philodendron scandens 'Micans' is an elegant climbing plant with velvety, dark green leaves and a bronze sheen, perfect for creating a warm, natural atmosphere.

PHLEBODIUM DAVANA

Phlebodium 'Davana' is a unique fern with blue-green, wavy fronds, decorative and air-purifying.

PHLEBODIUM AUREUM BLUE STAR

A fern with beautiful, slightly wavy grey-blue leaves. Easily adapts to most conditions, but does not like bright sunlight.

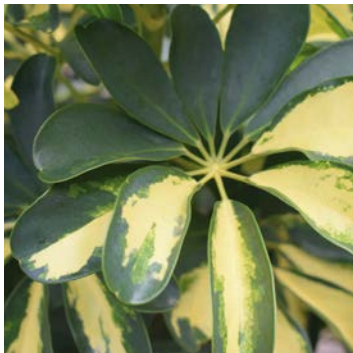

PLATYCERIUM BIFURCATUM

The Platycerium, also known as the stag horn fern, grows best in a light, shady spot. The mantle leaves are broad and round and provide support for the pendulous fertile leaves.

SCHEFFLERA ARBORICOLA

Known for its hand-shaped leaves. Requires little light, water and maintenance, which makes it ideal for interior planting.

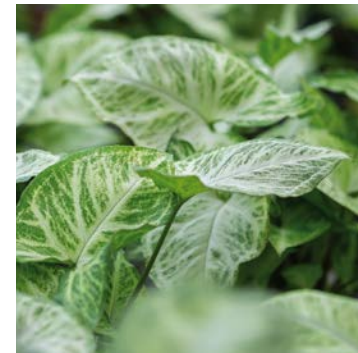

SCHEFFLERA ARBORICOLA 'JANINE'

Schefflera arboricola 'Janine' has small lime-green leaves mottled with shades of cream to yellow. Due to its finger-like leaf shape, it is commonly known in Dutch as the 'Vingersboom' or 'Finger Tree'.

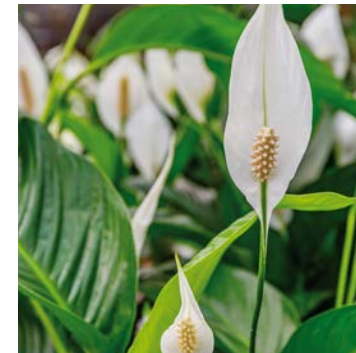

SCINDAPSUS PICTUS

The Scindapsus pictus is known as the Lucky Plant. The plant purifies the air and grows best in a place not directly in full sun. The plant is characterised by its small white dotted green leaves.

SYNGONIUM 'PIXIE'

Miniature climbing plant native to tropical rainforests with smaller leaves than most varieties that change shape as it grows.

SPATHIPHYLLUM 'CUPIDO'

Renowned for their white spoon-shaped flowers and air-purifying qualities.

PLANTGUIDE

OUTDOOR PLANTING

SWE
